

Sustainable vermicomposting of *Salvinia molesta*, Mitchell

By Ganesh Kumar T.

LAP Lambert Academic Publishing Mai 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x6 mm. Neuware - Research into vermicomposting and commercial projects has been developed in many countries. The increased interest in the use of earthworms in waste management seems a real and significant trend, across the world. The presentations at the four symposia cover a wide range, including the biology and ecology of vermicomposting species of earthworms, aquatic weed *Salvinia molesta*, methods of vermicomposting and the effects of growth of earthworms on *salvinia*. From my personal research experience, it is a challenge for scientists to bridge the gap between the laboratory and the field. Albeit, this book reviewed one of the most important methods and the whole human race will benefit if vermicomposting technology is accepted and adopted. 100 pp. Englisch.

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Ally Reichel**

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
